Education

University of Alberta

Bachelor of Science in Computer Science, Minor in Mathematics

Edmonton, AB

Aug. 2022 – May 2026

Experience

Software Engineer Intern

Schneider Electric

July 2024 – August 2024

Doha, Qatar

- Automated tasks using a **Python script**, reducing manual labor and **saving approx. 8 hours per month**.
- Increased data accessibility for teams by 30%** by **integrating RESTful APIs** using Structured Text Programming Language, enabling communication between Schneider Electric's devices and databases.
- Supported a 10% reduction in system downtime** by collaborating with senior engineers to troubleshoot and optimize PLC software, leveraging ladder logic and diagnostic tools.
- Enhanced operational productivity by 20%** by using **C#** to design and implement an intuitive Human-Machine Interface, enabling operators to monitor and control industrial processes more effectively.

Software Engineer Intern

Freelancing

July 2024

Remote

- Developed a full-stack e-commerce website for an Indian dress website resulting in \$300,000+ in gross sales.
- Successfully extended the services to **100+ countries**.
- Implemented and maintained RESTful APIs that supported seamless data exchange between the server and client-side application, contributing to a **20% increase in application performance**.
- Collaborated and communicated efficiently with a team of 3 to satisfy the clients' requirements

Projects

Collaborative Cloud Code Editor | *TypeScript, Docker, Cloudflare, SQLite, Postman*

March 2025

- Developed a full-stack application** that lets users edit code together in real time.
- Engineered RESTful APIs from scratch** for a scalable backend in **TypeScript** supporting real-time collaborative editing and cloud deployment, enhancing reliability across **Cloudflare environments**.
- Optimized** containerization with **Docker** to streamline deployment workflows **reducing** setup time and increasing consistency across environments.

SafeTalk.ai | *JavaScript, React, Python, Django, MongoDB,*

February 2025

- Developed a full-stack web application with **Django (Python)** in the backend and React on the front end.
- Deployed and managed cloud infrastructure on **AWS** using **Terraform**, automating environment setup to support secure and scalable web services
- Integrated D3.js** to generate performance reports featuring radar maps and actionable summaries.

Project Management App | *Java, React, SQL*

January 2025

- Developed a full-stack web application with **Spring Boot** in the backend and **React** on the front end.
- Utilized **Redux Toolkit** for efficient state management.
- Integrated Gmail notification functionality, providing automated email notifications for group projects.

QuickNews | *React Native, Redux, Node.js, Cherrio.js*

July 2024

- Developed a mobile app to summarize the latest news, featuring swipe-based navigation for easy browsing.
- Integrated an API for fetching news summaries and web scraping for additional content.
- Deployed web scraping techniques for content aggregation and JWT for secure user sessions.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript MySQL, HTML5, CSS3, C, C++, C#

Frameworks: Django, Node, Mongo(NoSQL), React, Express, JWT, REST API, BeautifulSoup4, Tailwind, Socket.io, Pandas, Prisma, Sass

Developer Tools: Amazon Web Services (AWS), Terraform, Docker, Kubernetes, Git, Postman, Jest, Mocha, Jupyter
